

Janell Simpson

Day 1

What is science telling us about climate change?

http://www.nsf.gov/news/special_reports/degree/history.jsp

Select a topic from the left side menu and watch the video clips for that question or topic. Write an individual summary (1 page) in MLA format of what you learned. Then pick one idea in the summary to investigate further with an up-to-date text-based source in Gale.

1. How do we know?
2. Intergovernmental Panel on Climate Change
3. The carbon cycle
4. The water cycle
5. Earth's heat balance
6. Climate modeling
7. What Americans believe about climate change
8. History of climate change research

Turn in your individual video clip summary to Echoactivities today. Include the Gale source at the end
