

## Tom Green

My academic background is in Fisheries and Mathematics. I have been a AP Environmental Science teacher, HS Mathematics and Biology teacher over the last 30 years. I am also a Texas Instrument national presenter. I run a small building in Michigan on the shores of lake Erie. See <http://www.facebook.com/pages/Knabusch-Center/101744483225077> for daily activities that we do at our center.

I have put two units in the High School courses area under AP Environmental, though they could be used in many other content areas.

See <http://www.resa.net/curriculum/curriculum/science/professionaldevelopment/climatechange/carboncycle/> for some original work that I have done using sensors to study climate change. Also much of what we do is on our Center's Facebook page, <http://www.facebook.com/pages/Knabusch-Center/101744483225077>
